Jacqueline Jean-Pierre (Oolagen - Toronto)

WrapAround at Shalem Mental Health Network is part of a growing support movement which is being developed in numerous communities throughout Hamilton and across Ontario. We seek to support volunteers in church communities as they reach out to individuals and families.

WrapAround is an effective long-term planning process used by communities to assist individuals and families who are facing a multitude of challenges in their lives. A trained WrapAround Facilitator works with an individual or family to identify their strengths and people who could be a team of supports to them. After a plan is developed, the WrapAround facilitator guides the individual/family and support team through the Wrap-Around process with the goal of improving the life of the WrapAround participants.
